Mobile warfare is a focus on speed and maneuver to cut off and disorganize enemy forces.

This is another great DLC Paradox has given us, because it gives us some new skins for tanks for France, United Kingdom, Germany, United States of America, Soviet Union, and some heavy cruiser skins, this DLC is very good in my opinion i would highly recommend buying this.. Cosmetic packs are brilliant. More please. The new tank models are nice, but have no right being paid DLC. Get it when it's insanely reduced in price, or better yet, don't get it at all.. What we need added to the game in future DLCs:

Monarchist Path for Soviet Union and France

Focus Trees for Scandinavia (Including Finland, of course)

And preferably all in one package

. Fieldmarshal Edition Upgrade Pack?

Its just a cosmetic pack, but if you enjoy many hours of HOI4 you might as well pick it up.. Just Cosmetics for tanks nothing much.
